Customer Consumption Profiles

Usage segment

usage_segment

- [ ] Higher off-peak share
- [ ] Higher peak share
- [ ] Other profiles

Households

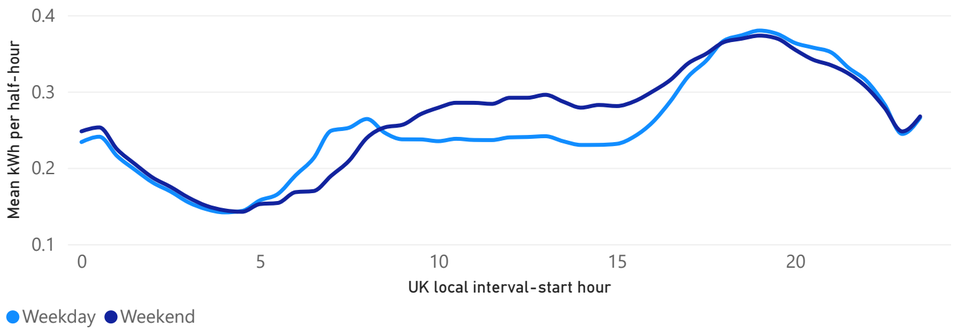

248

Design-period energy (MWh)

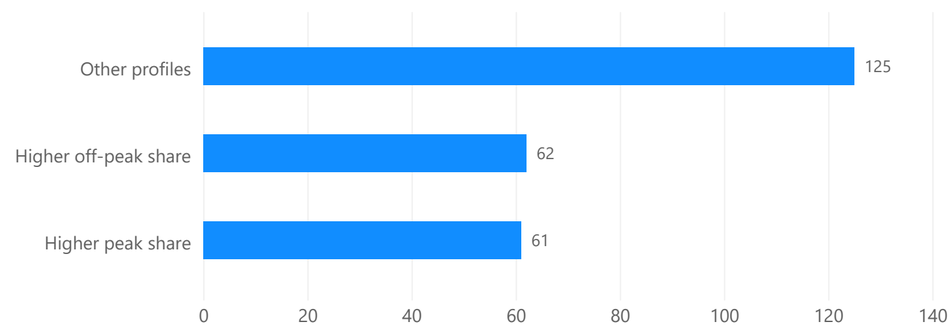

549.20

Design period: Jan–Jun 2013 | Historical UK household sample

Average daily consumption profile

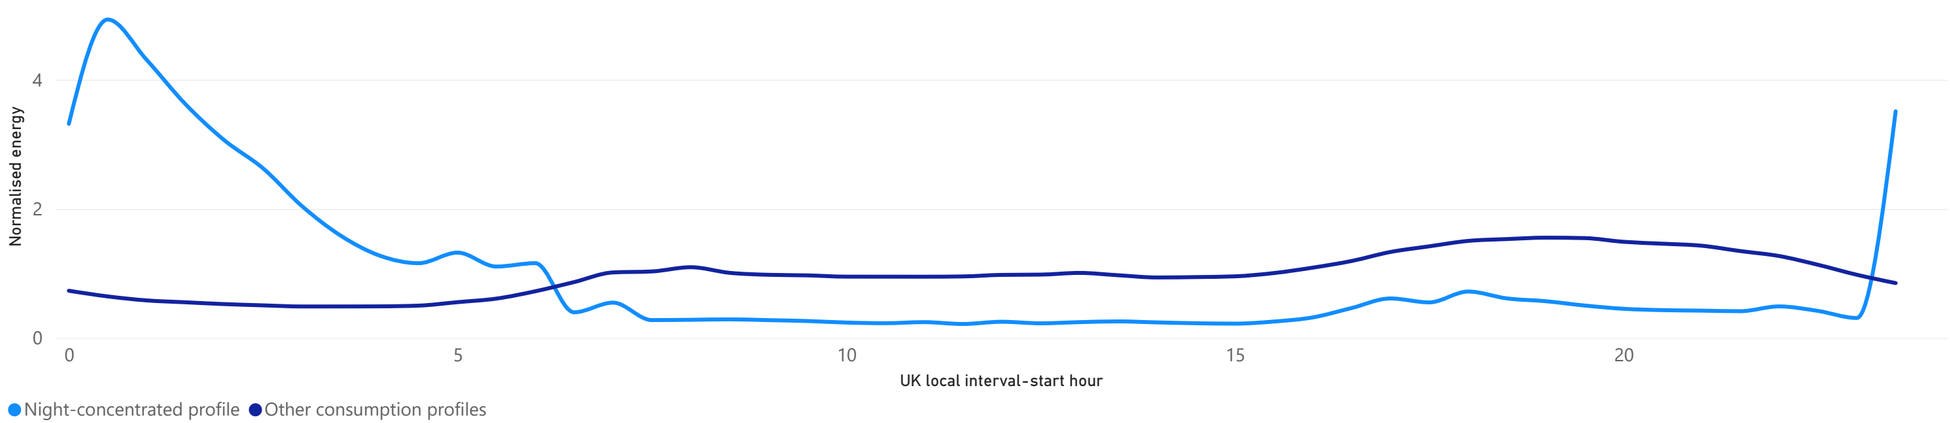

Households by design-period usage segment

Weekday consumption patterns by cluster

Average Normalised Energy by local_hour and design_profile_group

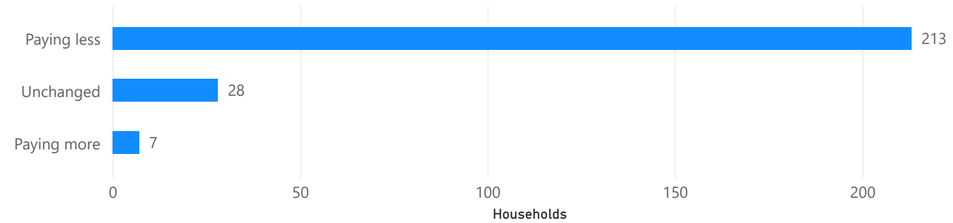

Tariff Impact

Validation period: Jul–Dec 2013 | Historical simulation | Energy charges before rebates

Total customer saving (GBP)	Overall customer saving (%)	Contribution margin (%)
3925.50	5.64%	25.49%

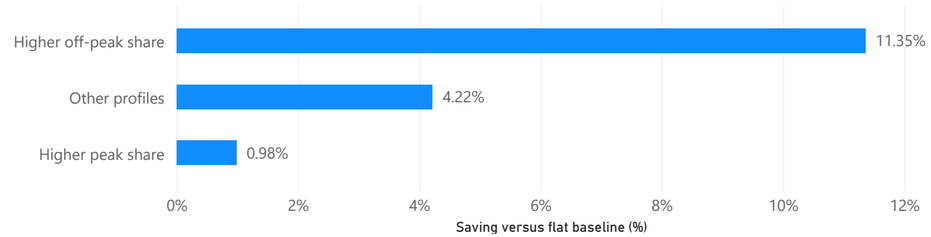

Household charge outcomes before rebates

Households by validation_charge_outcome

Customer saving by design-period usage segment

Aggregate Saving Pct by usage_segment

Household charge comparison before rebates

Household	Assigned tariff	Flat baseline (GBP)	Assigned charge (GBP)	Saving (GBP)	Charge outcome
MAC004646	Time-of-use	494.75	508.43	-13.68	Paying more
MAC004908	Time-of-use	702.46	710.71	-8.25	Paying more
MAC002170	Time-of-use	395.68	399.45	-3.77	Paying more
MAC002806	Time-of-use	168.75	171.95	-3.19	Paying more
MAC002517	Time-of-use	280.47	281.11	-0.64	Paying more
MAC000390	Time-of-use	311.77	312.33	-0.56	Paying more

Risk & Monitoring

Monthly monitoring: Jul–Dec 2013 | Energy charges before rebates

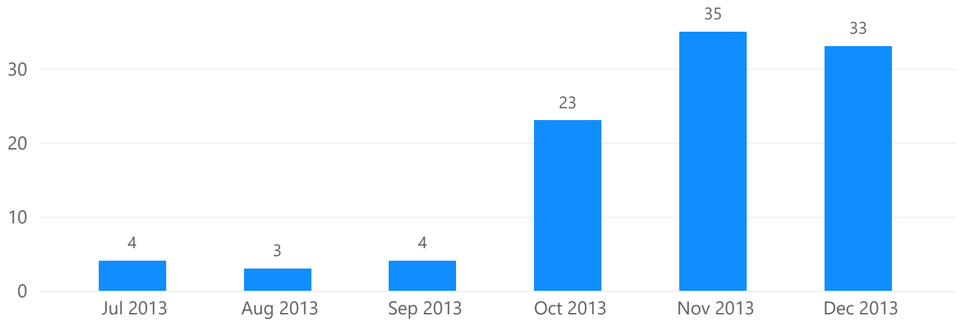

Households paying more in ≥1 month

55

Households paying more in ≥3 consecutive months

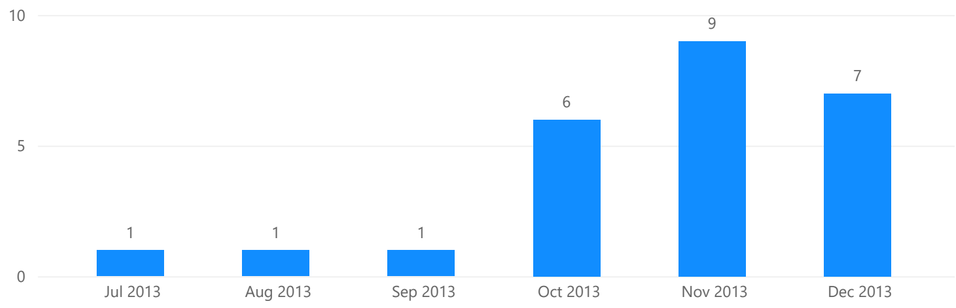

10

Households paying more by month

Households above the 2% monthly review threshold

Review threshold, not a monthly bill guarantee

Variable-cost stress test

After illustrative H2 rebate | Fixed portfolio
